

Digicon®

RCA Connectors

Application

Digicon RCA compression connectors offer the same unparalleled performance as our standard F-connector — but in an RCA format. These connectors eliminate the need to buy and inventory expensive component cables in varying lengths by enabling your technicians to make custom length cables from coaxial reels already available in the truck.

Universal RG59 and RG6 connectors fit all cable sizes within each series — and interchangeable color coded bands correspond with the colors on each component jack — minimizing the number of connectors you need to order and stock. Connectors are applied using the Digicon LCCT-SS59/11 compression tool.
